

## Description

As a current sensor, it is a widely used electrical device. When used with the central control system, it can realize automatic control and dispatching functions.

## Feature

- \* Support collecting 1 channel of current signal.
- \* Upload through the standard ModBus-RTU protocol of the 485 interface, and the maximum communication distance is up to 2000 meters.

## Specification

Model	TS-9206AC
Power supply	DC 10~30V
Maximum power consumption	0.3W
Collecting signal	Alternating current
Measuring range	0~30A
Resolution	0.01A
Precision	2.5%FS±0.05A
Transmitter circuit operating temperature	20°C~+60°C, 0%~80%RH (no condensation)
Output signal	RS485 output (standard ModBus-RTU protocol)
Dimension	110×85×44mm
